

MedCarousel

High density vertical storage that helps to automate the manual picking process, unit-based cabinet restocking; and facilitates cart-fill process for smaller hospitals.

- Ⓜ Automatically stores and retrieves information to **optimize and track inventory** while reducing storage space requirements.
- Ⓜ Uses bar code and “pick-to-light” technology to **increase medication safety**.
- Ⓜ **Is fully integrated with Robot-Rx** for accurate dispensing of non-robot items.
- Ⓜ Requires only 5'x10' of floor space and is available in sizes from 8' to 15' tall.
- Ⓜ Increases the efficiency of the unit-based cabinet's restocking process.
